

## Attach DB Release Notes

### 4.1 build 0

1. **Major Upgrade:** All the third-party controls (such as the grids, edit controls, buttons, etc.) in all screens have been upgraded to the latest version.

### 4.0 build 0

1. **Upgrade:** The third-party controls (such as the grids, edit controls, etc.) have been upgraded to the latest version.

### 3.1 build 0

1. **Enhancement:** Improved the look and feel of Attach DB.

### 3.0 build 0

1. **Upgrade:** The third-party controls (such as the grids, edit controls, etc.) have been upgraded to the latest version.
2. **New Feature:** Added the button Multiple Detach for detaching multiple databases at once.
3. **Enhancement:** Moved all the settings to the user's Documents folder (..\Documents\VEMAX\Settings\AttachDB).

### 2.2 build 0

1. **Upgrade:** The third-party controls (such as the grids, edit controls, etc.) have been upgraded to the latest version.

### 2.1 build 0

1. **Upgrade:** The third-party controls (such as the grids, edit controls, etc.) have been upgraded to the latest version.

### 2.0 build 00

1. **Upgrade:** The third-party controls (such as the grids, edit controls, etc.) have been upgraded to the latest version.
2. **New Feature:** Attach DB can now batch attach or detach multiple databases in silent mode. For this to work, open the INI file "AttachDBParams.ini" in Notepad and setup with valid database names and paths, then create a shortcut for the "AttachDB.exe" and pass the file "AttachDBParams.ini" as a parameter.

For example, on the Properties dialog of the shortcut, set the Target to:  
"D:\AttachDB\AttachDB.exe" "AttachDBParams.ini"

### 1.4 build 4

1. **Upgrade:** DevExpress controls have been updated to the latest version.
2. **Enhancement:** Attach DB now support attaching the database with existing log file for SQL Server 2005 or greater.

### 1.4 build 3

1. **Upgrade:** The zip compression components have been updated to the latest version. This will provide better support for databases over 4 GB and improve performance when extracting and compressing databases.

#### 1.4 build 2

1. **Problem:** Attach DB fails to create database user login on SQL Server 2005.  
**Status:** This problem is resolved.

#### 1.4 build 1

1. **Enhancement:** Attach DB now supports Windows Server 2008.

#### 1.4 build 0

1. **Upgrade:** DevExpress controls have been updated to the latest version.

#### 1.3 build 0

1. **Upgrade:** DevExpress controls have been updated to the latest version.
2. **Upgrade:** Updated to .Net Framework 2.
3. **Modification:** Modified method to unzip files to improve performance.

#### 1.2 build 1

1. **Modification:** Minor changes to messages displayed by the application.

#### 1.2 build 0

1. **Modification:** Upgraded to the latest DevExpress components.

#### 1.0 build 24

1. **New Feature:** Upgraded to the latest DevExpress .NET components.

#### 1.0 build 23

1. **New Feature:** If any user is connecting to the database when trying to detach a database from the server, it will show a grid with the connections' information.
