

## Attach DB Release Notes

### v1.4 build 3

1. **Upgrade:** The zip compression components have been updated to the latest version. This will provide better support for databases over 4 GB and improve performance when extracting and compressing databases.

### v1.4 build 2

1. **Problem:** Attach DB fails to create database user login on SQL Server 2005.  
**Status:** This problem is resolved.

### v1.4 build 1

1. **Enhancement:** Attach DB now supports Windows Server 2008.

### v1.4 build 0

1. **Upgrade:** DevExpress controls have been updated to the latest version.

### v1.3 build 0

1. **Upgrade:** DevExpress controls have been updated to the latest version.
2. **Upgrade:** Updated to .Net Framework 2.
3. **Modification:** Modified method to unzip files to improve performance.

### v1.2 build 1

1. **Modification:** Minor changes to messages displayed by the application.

### v1.2 build 0

1. **Modification:** Upgraded to the latest DevExpress components.

### v1.0 build 24

1. **New Feature:** Upgraded to the latest DevExpress .NET components.

### v1.0 build 23

1. **New Feature:** If any user is connecting to the database when trying to detach a database from the server, it will show a grid with the connections' information.
