

Custom Control Panel Release Notes

1.6 build 00

1. **Upgrade:** The Custom Control Panel application has been upgraded to support .NET Framework version 4.0. This version of the .NET Framework needs to be installed before the Custom Control Panel application can be run.

v1.5 build 0

1. **Problem:** In the Security & Settings screen, some of the MMS Agency Settings are cut off when the setting name is longer than 50 characters.
Status: This problem has been resolved.
2. **Modification:** In the Security & Settings screen, the Tree Label list box has been removed to provide more space for the setting grid.
3. **New Feature:** Added the Grid Options to the Grid toolbars in the Custom Control Panel.
4. **Problem:** In the User List screen, the Date Last Modified is being set to the current date for all records when any one record is changed. Also the time is not displayed.
Status: This problem has been resolved.
5. **Modification:** In the User List screen, don't allow multiple records to be added or edited before saving. When a Configuration Manager is done editing a record and moves off that record, validate and save the record.
6. **Upgrade:** DevExpress controls have been updated to the latest version.

v1.4 build 2

1. **Problem:** On the Security & Settings screen, the grid on the right hand side is showing duplicated setting values.
Status: This problem has been resolved.

v1.4 build 1

1. **New Feature:** Custom Control Panel now supports Windows Server 2008.

v1.4 build 0

1. **Upgrade:** DevExpress controls have been updated to the latest version.

v1.3 build 1

1. **Problem:** On the Security & Settings screen, the Setting Value column is not showing the correct editor for the corresponding record.
Status: This problem has been resolved.

v1.3 build 0

1. **Upgrade:** DevExpress controls have been updated to the latest version.
2. **Upgrade:** Updated to .Net Framework 2.
3. **Modification:** Grid settings are now stored by user instead of computer/user combination.

v1.2 build 0

1. **Modification:** Updated to latest version of DevExpress controls to fix defects and improve performance.

v1.1 build 6

1. **Problem:** The setting for User Can Change Their Security (2026) is not available for CCP, only WRR CP. This means you have to add WRR CP as an application in order to access this setting.
Status: A new setting, 2117, has been added for User Can Change Their Security for CCP. The Security and Settings screen will check 2117 for CCP and 2026 for WRR CP.
2. **Problem:** The Security and Settings screen only checks setting number 2022 for the setting User Can Add Users. This is the setting for WRR CP. CCP uses setting number 2101.
Status: The Security and Settings screen now checks 2101 for CCP and 2022 for WRR CP.

v1.1 build 5

1. **Modification:** If the Agency setting 2085 (Use Client Side Bar Tables) is set to Yes and there is no data in the Client Side Bar tables, then the Vemax Side Bar tables will be used.

v1.1 build 4

1. **Problem:** In the User List screen all the columns may be hidden when you load the screen.
Status: This problem has been fixed.

v1.1 build 3

1. **Modification:** In the User List screen added password encryption for storing user logon passwords in the database.
2. **Modification:** Updated to the latest DevExpress controls to fix some defects and improve performance.
3. **Modification:** Grid settings are now saved to the database instead of to the computer.
4. **Problem:** In the security and settings screen when you open the Add Application screen the grid is behind the bottom panel so some records cannot be seen.

Status: This problem has been resolved.

5. **Modification:** In the security and settings screen the database column is disabled when no application has been added.

6. **Problem:** In the Security and Settings screen users that have the setting Security Group Options set to anything but [All] will be unable to set the security group for where they should be able to.

Status: This problem has been resolved.

7. **Problem:** In the User List screen the program is searching for a setting that is a WRR CP setting. This means that to change the setting from the default users must add the WRR CP application to the Security and Settings screen. A new setting should be added for CCP.

Status: This problem has been resolved. Setting 2101 has been added and must be set for any user (including Sysconfig) to be able to modify the User List screen.

8. **Problem:** In various screens when you attempt to clear a value by using Ctrl+Delete an error occurs.

Status: This problem has been resolved.

v1.1 build 2

1. **Problem:** In the User List screen the validation message displayed when the user name is incorrect.

Status: This problem has been fixed.

v1.1 build 1

1. **Problem:** Unable to delete users with records in the error log.

Status: This problem has been fixed.

v1.1. build 0

1. **Problem:** Unable to delete users that have settings.

Status: Problem fixed.

2. **Upgrade:** DevExpress controls upgraded to latest version.

v1.0 build 8

1. **New Feature:** Added the menu item Release Notes to the Help menu.
