

## Release Notes for WRR CP

### v1.8 build 4

1. **Problem:** In the Asset Type/Detailed Asset screen, the new row is not visible when the New Detailed Asset button is pressed.  
**Status:** This problem has been resolved.
2. **Problem:** In the Funding Source/Charge Code screen, the new row is not visible when the New Charge Code button is pressed.  
**Status:** This problem has been resolved.
3. **Problem:** In the Location Scheme Designer screen, the value entered into a field is not saved the first time it is entered.  
**Status:** This problem has been resolved.

### v1.8 build 3

1. **New Feature:** Added the “Problem Type” screen to the Lists side bar group.

### v1.8 build 2

1. **Enhancement:** WRR CP now supports Windows Server 2008.

### v1.8 build 1

1. **Modification:** The Org Unit column is now visible in the Funding Source screen.
2. **Modification:** The validation for the Crew screen has changed. The crew name and org unit combination must now be unique.
3. **Modification:** The validation for the Funding Source screen has changed. The code and org unit combination must now be unique.

### v1.8 build 0

1. **Upgrade:** The third party controls (such as the grids, edit controls, etc) have been upgraded to the latest version.
2. **Enhancement:** Added “Strategy/Asset Grp” lookup box to the Location Scheme Designer for linking the location scheme to a strategy or asset group.
3. **New Screen:** Added the Org Unit Translation screen. This translates MMS RG Code or AMPS Org Unit to WRR Org Unit.

### v1.7 build 2

1. **New Feature:** Added “Export to WT” button to the “Crew” screen for exporting WRR Crew data to Work Tracker database. This button is only visible when the Work Tracker database exists.

### v1.7 build 1

1. **Problem:** The Response Time screen causes an error saying, “The ConnectionString property has not been initialized” when the grid is expanded and the user presses the X button to close the application.  
**Status:** This problem has been resolved.

#### v1.7 build 0

1. **Upgrade:** WRR CP has been upgraded to support version 2 of the Microsoft .NET Framework. The [iBOSToolsPrerequisites\\_2\\_0.exe](#) install is needed for this version of WRR CP.
2. **Upgrade:** The third party controls (such as the grids, edit controls, etc) have been upgraded to the latest version.
3. **Modification:** Grid settings are now stored by user instead of computer/user combination.

#### v1.6 build 1

1. **Modification:** WIN # and Charge Code have been added to the LWAG screen. Both columns will only be shown if the agency settings (Show WIN # in LWAG screen and Show Charge Code in LWAG screen) are set to Yes. (If the LWAG screen is viewed before the settings have been switched to Yes the columns may not be shown automatically. They will have to be dragged onto the grid from the Show Columns feature.)
2. **Modification:** Location Scheme Designer: Modified the screen so grid settings are saved to the database instead of the user’s computer.

#### v1.6 build 0

1. **Modification:** Updated to the latest DevExpress controls to fix some defects and improve performance.
2. **Modification:** All screens that use grids for data entry: When a new record is created all grouping and sorting is removed. The grouping and sorting is restored when the new record is saved.

#### v1.5 build 4

1. **Problem:** The Change Log Designer screen’s Grid Toolbar is not working. Errors occur when you attempt to use it.  
**Status:** This problem has been resolved.
2. **Problem:** In the Fiscal Year screen when you create a new row and attempt to set the start date it changes the start date value for the row you were on before creating the new row.  
**Status:** This problem has been resolved.

#### v1.5 build 3

1. **Modification:** Updated to the latest DevExpress controls to fix some defects and improve performance.

#### v1.5 build 2

1. **Problem:** In various screens when you attempt to clear a value by using Ctrl+Delete an error occurs.  
**Status:** This problem has been resolved.
2. **Problem:** In the Fiscal Year screen when you click the Cancel button the Open button image in the detail grid is lost.  
**Status:** This problem has been resolved.

#### v1.5 build 1

1. **Problem:** In the Security and Settings screen users that have the setting Security Group Options set to anything but [All] will be unable to set the security group where they should be able.  
**Status:** This problem has been resolved.
2. **Problem:** In the Location Scheme Designer screen some of the controls do not show data when you first load the screen.  
**Status:** This problem has been resolved.

#### v1.5 build 0

1. **Modification:** Updated to the latest DevExpress controls to fix some defects and improve performance.
2. **Modification:** Grid settings are now saved to the database instead of to the computer.
3. **Problem:** In the security and settings screen when you open the Add Application screen the grid is behind the bottom panel so some records cannot be seen.  
**Status:** This problem has been resolved.
4. **Modification:** In the security and settings screen the database column is disabled when no application has been added.
5. **Modification:** In the LWAG screen the average unit cost column is now enabled and can be edited.

#### v1.4 build 6

1. **Modification:** In the User List screen added password encryption for storing user logon passwords in the database.

#### v1.4 build 5

1. **Modification:** In the Charge Code WRR Lookup screen the Strategy Node lookup is now filtered by the database, active, and the source. Org Unit column is also added to the lookup list.

#### v1.4 build 4

1. **Modification:** When a user logs in additional information including the DatabaseName, ComputerName, and Connection are stored in the CurrentUsers table.
2. **Problem:** In the Location Scheme Designer if a location scheme is used in WRR the grid is disabled rather than put into read only mode. This means that you cannot scroll the grid to view the location scheme field data.  
**Status:** This problem has been resolved.

#### v1.4 build 3

1. **Modification:** In the Asset Type, Funding Source, Fiscal Year, and Response Time screens it now updates the Date Last Modified of the master record when you edit a detail record.
2. **Modification:** In the Fiscal Year Screen when you click the Open button for the work calendar it will automatically save your changes rather than ask if you want to save.
3. **Problem:** In the Response Time screen an error may occur when you modify the master record and attempt to save the changes.  
**Status:** This problem has been resolved.

#### v1.4 build 2

1. **Problem:** In the Priority screen when you enter a new priority the priority order may change when you save the record.  
**Status:** This problem has been fixed.
2. **Problem:** In the Scheduling Status screen when you enter a new status the status order may change when you save the record.  
**Status:** This problem has been resolved.

#### v1.4 build 1

1. **Problem:** In the Response Time screen when you have a response time that has a GWAG, but no Asset Type, if you leave the row you will get an error.  
**Status:** This problem has been resolved.

#### v1.4 build 0

1. **Upgrade:** DevExpress controls upgraded to latest version.

#### v1.3 build 41

1. **New Feature:** Added the menu item Release Notes to the Help menu.

v1.3 build 40

1. **Problem:** When a grid is in edit mode, and then you close the program it asks if you would like to save before closing. If the screen contains invalid data it will say the save failed, and then close the program not giving users an opportunity to change the data. This results in all changes being lost.  
**Status:** This defect has been resolved.
